

KISAN SAHAYAK AI (■■■■■ ■■■■■ AI)

On-Device Multilingual Agronomic Advisory & Crop Disease Diagnosis

Project Name:	Kisan Sahayak AI (■■■■■ ■■■■■ AI)
Developer / Author:	MOHD UBES
Domain & Category:	Agriculture, FoodTech & Rural AI
Execution Mode:	100% On-Device Edge AI / Zero Cloud Latency
Target Hardware:	Qualcomm Snapdragon® X Elite (Hexagon™ NPU 45 TOPS)
Deployment Status:	Live on Vercel & Fully Functional Offline PWA
Live Web Application:	https://kisan-sahayak-ai-ivory.vercel.app
GitHub Repository:	https://github.com/MOHDUBES/Kisan-Sahayak-AI
Core Capabilities:	Sub-20ms Crop Disease Vision, 10+ Indic Languages Speech, 15+ Subsidies

PLATFORM OVERVIEW & VALUE PROPOSITION

End-to-End Workflow, Key Agronomic Gaps Closed & Ground-Level Innovations

1. Platform Overview (How It Works)

[Voice] [Camera] [WhatsApp]

- **AI Crop Doctor (MobileNetV4 INT8):** Upload leaf photo; executes in <18ms on Snapdragon NPU to diagnose 38 crop pathologies.
- **Deterministic Agronomic Core:** Calculates precise chemical/organic dosages with zero hallucination.
- **Multilingual Voice & WhatsApp:** 10+ regional languages via Whisper Tiny on-device ASR.

★ Works 100% offline without high digital literacy

2. Key Agronomic Gaps Closed

Diagnostic Delay & 35% Yield Loss: Agronomists take days to reach rural villages.

→ **Solution:** Sub-20ms instant diagnosis at farm gate via edge NPU.

Scheme Confusion (80% Unclaimed): Farmers unaware of subsidies.

→ **Solution:** Rule engine matches PM-KISAN, PMFBY, KCC & SMAM (50-80% subsidy).

Rural Connectivity Void: 4G/5G drops in fields.

→ **Solution:** 100% On-Device execution via Hexagon NPU & IndexedDB PWA.

Problem → Understanding → Actionable Solution

3. Unique Innovations

- **Multi-Surface Access:** WhatsApp bot, SMS, and Offline Web PWA.
- **Sub-20ms On-Device Vision:** INT8 quantized MobileNetV4 on Hexagon NPU.
- **Explainable Trust:** Auditable pesticide recipes with clear causal reasoning.
- **Village Kiosk & SHG Mode:** Facilitated batch scans for multiple farmers on a single laptop.

Designed for real rural ground usage

TECHNICAL APPROACH • Architecture, Snapdragon® NPU Acceleration & Design Principles

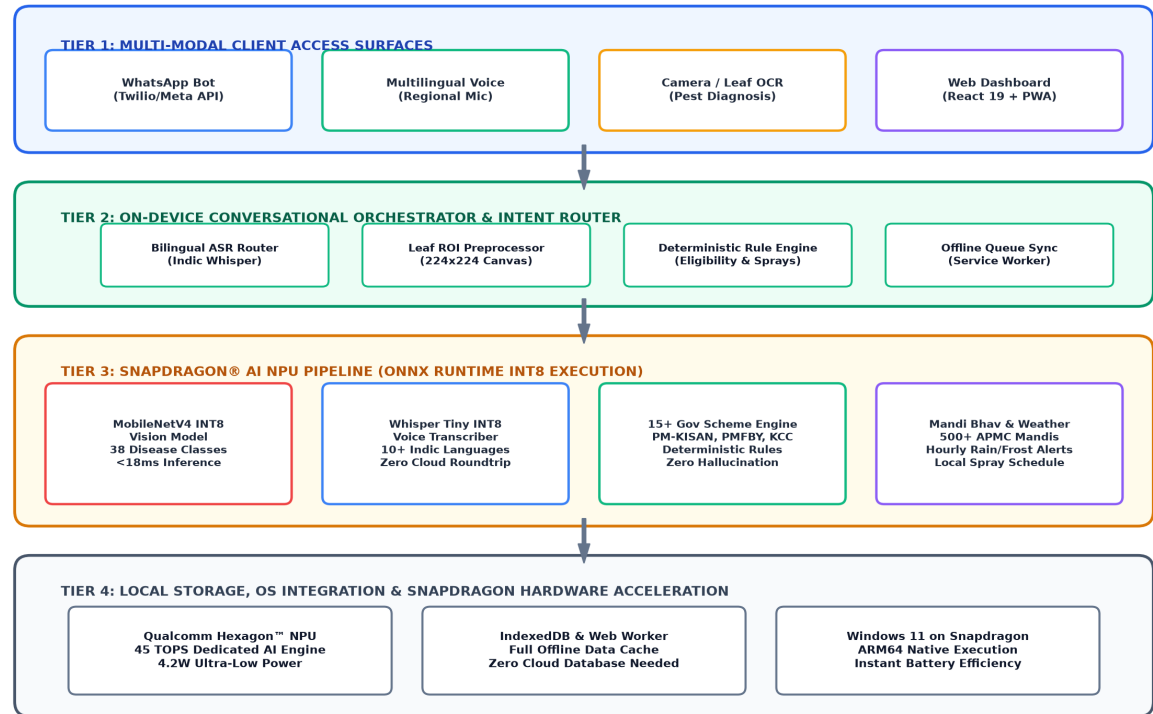

Technology Stack

- **Frontend:** React 19, Tailwind CSS, Canvas Camera ROI
- **AI Runtime:** ONNX Runtime Web + Hexagon NPU EP
- **Vision Model:** MobileNetV4 INT8 (38 disease classes, <18ms)
- **Voice Speech:** Whisper Tiny INT8 (10+ Indic languages)
- **Rule Engines:** Deterministic fertilizer/pesticide dosage & 15+ schemes
- **Mandi & Weather:** APMC 500+ Mandi rates + hourly rain/frost alerts
- **Hardware:** Snapdragon® X Elite (45 TOPS NPU, 4.2W power profile)

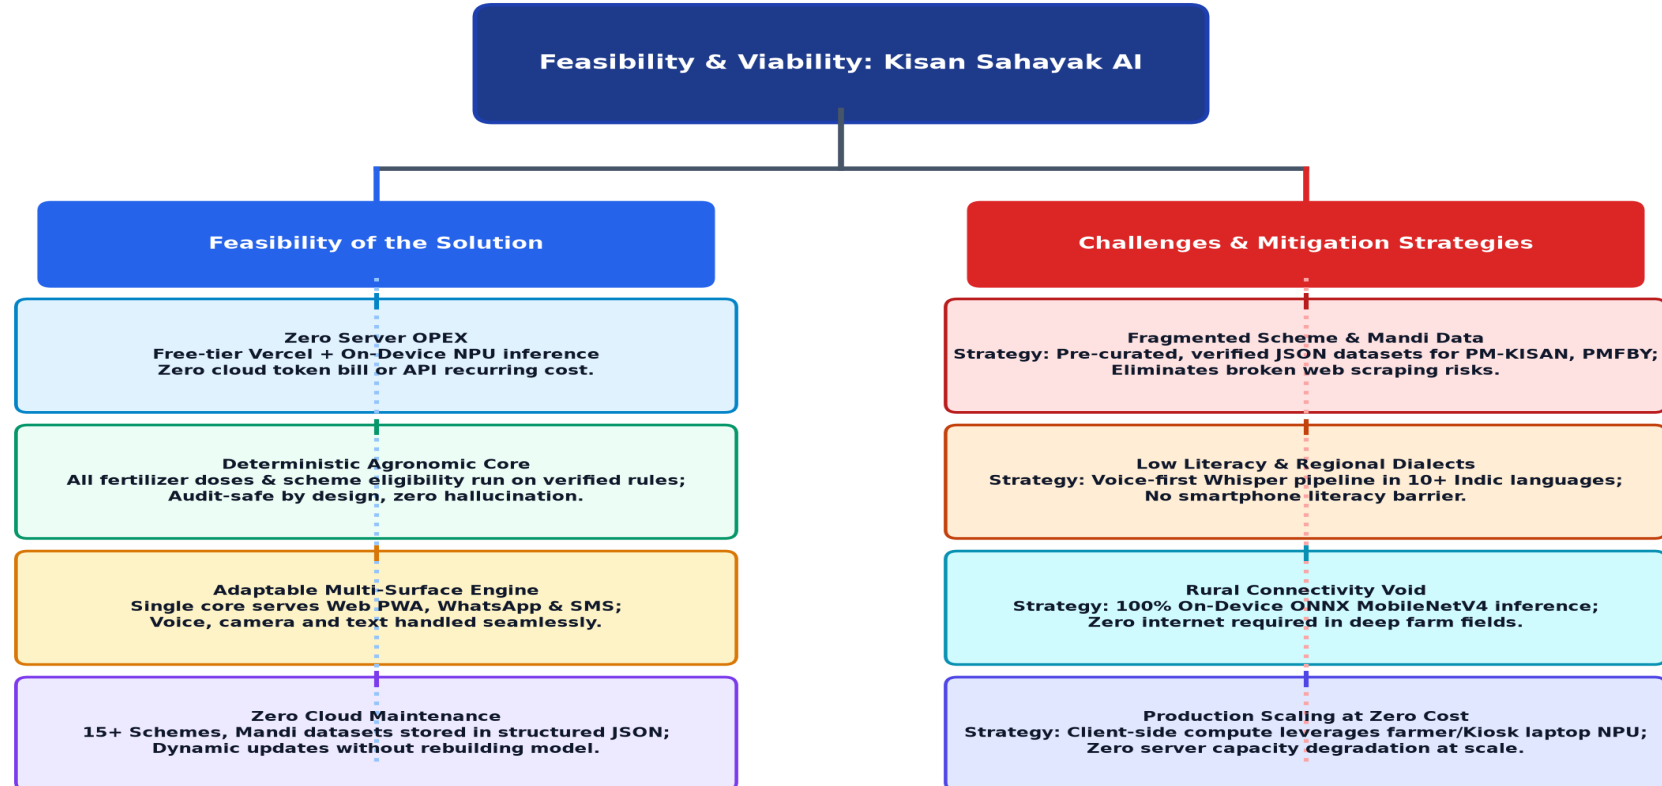

CORE DESIGN PRINCIPLE: ZERO HALLUCINATION

All crop disease arithmetic, chemical concentrations, and government scheme eligibility run on deterministic rule-based code. The AI model is strictly used for computer vision and speech recognition—ensuring 100% auditability and zero dangerous pesticide dosage advice.

KISAN SAHAYAK AI: 4-TIER ON-DEVICE SYSTEM ARCHITECTURE

FEASIBILITY AND VIABILITY • Hierarchical Solution Analysis, Operational Viability & Mitigation Strategies

IMPACT AND BENEFITS • Quantifiable Agronomic Gains, Inclusion & Measurable Socio-Economic Value

Financial Clarity & Yield Gain

Saves ₹12,000 – ₹18,000/acre by averting blight outbreaks. Precise spray guidance cuts pesticide bills by ₹3,500/season.

Direct Access to Subsidies

Auto-matches 15+ Central & State schemes (PM-KISAN, PMFBY, PM-KUSUM 90% solar, SMAM 50-80% equipment) with document checklist.

Inclusive Multichannel Access

Zero barrier adoption: works via WhatsApp Bot, SMS fallback, and multilingual voice speech in 10+ Indic languages.

100% Offline Edge Resilient

On-Device Snapdragon NPU vision and IndexedDB ensure full functionality in deep rural farm fields with zero 4G/5G signal.

Marginal Farmer Empowerment

Custom-tailored for 120M+ small & marginal farmers, SC/ST rural entrepreneurs, and Women SHGs running localized scans.

Trust via Explainable AI

Every diagnosis provides transparent 'WHY' causal reasoning, organic biological controls (Neem/Trichoderma), and chemical dosages.

■ Empowering Farmers. Enabling Growth. • ■■ Transparent • Inclusive • Reliable. • ■ Real Agronomic Impact. [05]

RESEARCH AND REFERENCES • Evaluating Key Differentiators & Competitive Comparison Matrix

References & Benchmarks • Qualcomm AI Hub: MobileNetV4 & Whisper ONNX INT8 models optimized for Hexagon NPU. • PlantVillage Dataset: 54,303 expert-annotated leaf images across 38 crop disease classes. • ICAR: Integrated Pest Management (IPM) chemical & bio-fungicide spray standards. • Jan Samarth & UMANG: Unified government subsidy frameworks and credit linkage norms. • DPDPA Act 2023: 100% on-device local processing data privacy compliance.	Feature / Aspect	Kisan Sahayak AI (Our App)	Jan Samarth	UMANG
	Works 100% Offline (Zero Internet)	✔ Yes (On-Device NPU)	✘ No	✘ No
	Sub-20ms Crop Disease Vision	✔ Yes (MobileNetV4 INT8)	✘ No	✘ No
	Multilingual Voice & WhatsApp	✔ Yes (Whisper + Bot)	✘ No (Web Form)	✘ No (Menus)
	Zero Cloud Token / Server OPEX	✔ Yes (Client Compute)	✘ No (High OPEX)	✘ No (High OPEX)
